## YOUR PARTNER FOR SCAFFOLD RENTAL

Whether you are responsible for setting up the scaffold or for making the business decisions – Scafom-rux products and services offer you decisive advantages from both a user and commercial point of view. These range from the certification of our products for the use in various industries to fast response and reaction to your enquiries.

At Scafom-rux, we not only focus on high-quality scaffolding products but also on building a strong partnership with you. This also includes providing you with flexible rental solutions tailored to your individual needs.

# SCAFFOLD RENTAL OPTIONS

Are you planning a project that requires specific scaffolding parts you only need once? Or is business particularly good, and you need additional scaffolding material for a short period? For these and other situations, Scafom-rux offers flexible scaffolding rental options for our scaffolding systems and products.

## SHORT TERM SCAFFOLD RENTAL

Are you planning a scaffold with a short standing time? Or do you need increase your inventory at short notice? At Scafom-rux, you can easily rent your scaffolding material, starting from a period as short as 4 weeks. This includes everything from complete scaffolding systems to all kinds of scaffolding accessories.

## LONG TERM SCAFFOLD RENTAL

Even for longer standing times of your scaffold, renting scaffolding is worthwhile. Since you don't have to store rented material after your project is completed, you can conveniently return it to us. This saves space in your storage and gives you maximum flexibility to meet peak order periods.

## SCAFFOLD RENTAL TAILORED TO YOUR NEEDS

Whether it's short-term, long-term rental, or rent-to-buy agreements, at Scafom-rux you can count on a quick response to your needs. To ensure our rental offer always provides exactly what you need, we work with you to create rental agreements tailored to your individual requirements. This includes discounts for large quantities of material, longer rental periods, rent to buy agreements as well as the rental of scaffolding accessories and special parts.

Our rental and service offer and may vary depending on the Scafom-rux location. If you have any questions, please contact your local Scafom-rux team!

## SERVICES FOR SCAFFOLD RENTAL

The Scafom-rux team not only provides you with leading scaffolding systems for construction, infrastructure or industry projects, but also works with you to meet your challenges.

So whether you buy or rent your scaffolding from us, you always get our full service package. This includes technical and logistical support, engineering services such as planning or structural calculations for your scaffolds, as well as training for your team and external partners.

### ENGINEERING SUPPORT

The Scafom-rux engineering team is happy to support you with various scaffolding and technical services to make your project a success, including

- Technical support whenever you need it: starting from the initial quotation to the completion of your project
- Drawings, static calculations and designs, including calculation memory
- Site visits in case of challenging situations or designs
- Customisation of scaffolding components to the requirements of your project assembly and use of each of our systems.

### LOGISTIC SUPPORT

Sudden demand for scaffolding material is part of your daily business. So it goes without saying that when you choose your rental material, you also consider how and when it can be delivered. That's why Scafom-rux offers you fast and reliable delivery of high quality, clean, and certified scaffolding material. Our team understands the tight schedules you're working to and will organise fast delivery when you need it.

Especially for projects where space is at a premium, it may be necessary to adjust delivery intervals. We are happy to work with you on this and, for example, deliver your material to match the assembly and dismantling sequences of your scaffolding.

### TRAININGS

To make your work easier and safer and to speed up construction times, Scafom-rux offers a variety of trainings for your scaffolders, engineers, or your external partners.

- **TRAININGS FOR SCAFFOLDERS**  
Learn how to assemble and dismantle our scaffolding systems. We are happy to issue a certificate upon completion of the training.
- **RESCUE TRAININGS**  
Our trained staff prepares you for what to do in case of an emergency and teaches you accident prevention.
- **TRAININGS FOR ENGINEERS**  
Our engineers teach you the planning and configuration of our systems in your projects.
- **TRAININGS FOR SCAFFOLDING CALCULATION AND TECHNICAL DESIGN**  
Our team supports you with the implementation of your project as well as with the assembly and use of each of our systems.

# WHEN SHOULD YOU CONSIDER SCAFFOLD RENTAL?

➤ A short-term need for additional scaffolding material doesn't have to be a challenge. Renting scaffolding is a cost-effective way to temporarily increase your inventory. Scafom-rux supports you with flexible scaffold rental options, personalized advice, and the quick and reliable delivery of high-quality, clean, and certified scaffolding material.

But in which cases is renting scaffolding particularly worthwhile for you? Here are a few examples:

## ■ 80/20 RULE

The 80/20 rule\* is especially profitable for you: keep 80% of the scaffolding material in your own stock and rent the remaining 20% on a short-term basis. This allows you to handle the situations mentioned below in a particularly cost-efficient manner.

## ■ LARGE QUANTITIES OF MATERIALS

When you need to access particularly great heights with scaffolding, you'll require a lot of scaffolding material. In this case, renting scaffolding can be the right solution for you, especially if you only need a temporary addition to your existing inventory.

*\*Of course, the 80/20 ratio can vary depending on the size and profitability of the project.*

## ■ SCAFFOLDING PARTS YOU ONLY NEED ONCE

If you need to scaffold an unusually shaped object, you may only need certain pieces of scaffolding for this one project. Renting scaffolding gives you the flexibility to avoid storing materials you won't need again.

## ■ SEASONAL PEAKS IN YOUR WORKLOAD

Your inventory is sufficient for most of the year, but during periods with numerous scaffolding projects at the same time, you need additional material. Renting extra scaffolding to cover seasonal peaks in demand saves you storage costs.

➤ Scan the QR code for more information on scaffold rental:

## RENT HIGH-QUALITY SCAFFOLDING

Scafom-rux provides you with scaffolding material that meets the highest quality standards. Naturally, these standards also apply to our rental equipment.

All our rental material comes from our Scafom-rux rental yards with worry-free guarantee. Thanks to this, you can be assured that you will only receive material that meets the highest safety standards and has been properly maintained and serviced.

### CERTIFIED SAFETY

Whether you are planning a construction, industrial or infrastructure project, one requirement remains the same: you must be able to rely 100 percent on the quality and safety of the scaffolding systems you use. Certificates and approvals from recognised institutes give you this assurance.

It is our top priority to ensure that you are always safe when working with our scaffolding systems. That is why we have had the quality of our scaffolding and compliance with the highest safety standards certified by the following renowned institutes:

- AENOR
- AFNOR
- DIBt
- LNEC
- RISE
- VÚBP
- WorkSafe

## SCAFFOLD RENTAL DIRECTLY FROM THE MANUFACTURER

At Scafom-rux, you can rent your scaffolding material directly from the manufacturer. Running our own production facilities is the best way to ensure that we can pass on our scaffolding systems to you with the highest quality standards. Regardless of whether you want to buy or rent them from us. This is regularly confirmed through internal and external inspections of our products and production.

### CERTIFIED PRODUCTION PROCESS

Our quality assurance process starts with the selection of certified raw materials and continues throughout the entire production chain. This means that you always receive products of consistently high quality - regardless from which of our factories your material comes from. This is regularly confirmed through internal and external inspections of our products and production.

# SCAFFOLDING SOLUTIONS

The Scafom-rux product range is one of the most extensive on the market. The great advantage: our scaffolding solutions are based on seamless and certified compatibility. This applies to both scaffolding solutions from our own product range and with other standard systems on the market. This way, you can future-proof your inventory and remain flexible in your supplier choices.

## RINGSCAFF MODULAR SCAFFOLD

### UNBEATABLE VERSATILITY

No matter what project you have on your agenda, the Scafom-rux modular scaffold RINGSCAFF offers you maximum flexibility. The RINGSCAFF connection method makes the assembly and dismantling of your scaffold particularly quick and easy. Thanks to the small number of basic components and their versatile applications, the RINGSCAFF modular scaffold is also particularly economical to store and transport.

Moreover, RINGSCAFF helps you maintain the value of your inventory: it is not only certified by several recognized authorities worldwide but also approved for mixing with other common scaffolding systems.

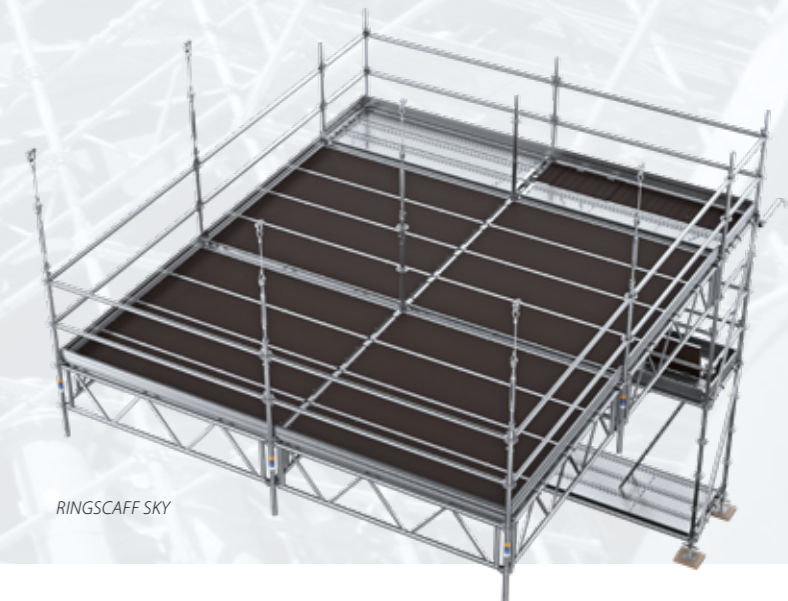

RINGSCAFF

## RINGSCAFF SKY

### INNOVATIVE SUSPENDED SCAFFOLDING

Especially for working areas that are difficult to reach, suspended scaffolding pays off. With RINGSCAFF Sky, you can rely on the highest safety standards and avoid risky climbing or attaching components underneath the work floor.

RINGSCAFF Sky is a cost-efficient suspended scaffolding system made from basic components of the established RINGSCAFF modular scaffolding system. Thanks to the manageable number of basic components, RINGSCAFF Sky is quick and easy to assemble using only hand tools and requires only a few suspension points.

RINGSCAFF SKY

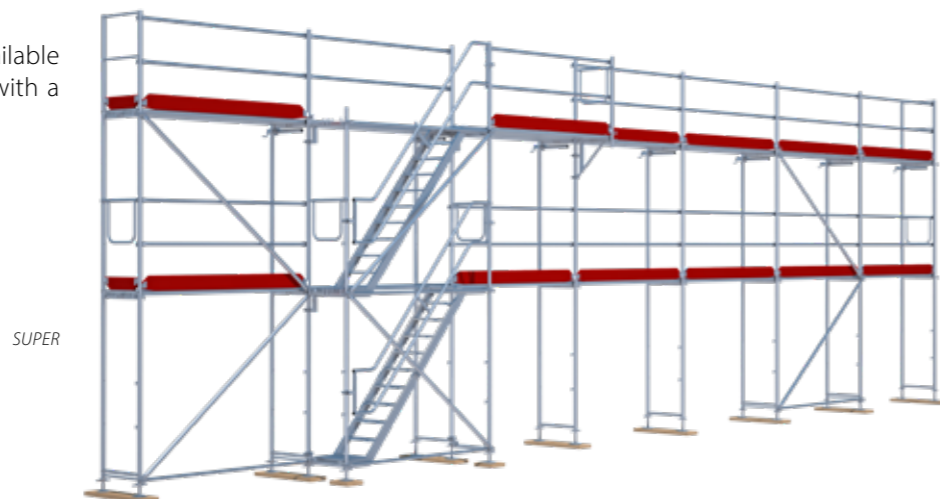

# CONSTRUCTION SCAFFOLDS

## > SUPER

**METRIC, FAST AND EASY**

The Scafom-rux SUPER facade scaffold is one of the most popular systems on the market. No other scaffold can be assembled and disassembled as quickly and with as few basic elements. The practical tilting pin ensures a self-locking connection between the frames, guardrails, and diagonals. The components can be easily assembled by a single person without the need for constant running back and forth.

The SUPER scaffold system is available in widths of 0.65 m and 1 m, with a standard frame height of 2 m.

## > FRAMESCAFF

**COMPATIBILITY IN 07 DIMENSIONS**

The FRAMESCAFF facade scaffold has a standard width of 73 cm and bay lengths in the 07 dimension. This makes it compatible with widely recognized market standards. Thanks to approvals from the German Institute for Building Technology (DIBt), you can use FRAMESCAFF scaffold components either in combination with other 07 dimension scaffold systems or as a standalone scaffold system.

# CONSTRUCTION SITE PROTECTION

## > CLADDING AND ROOFS

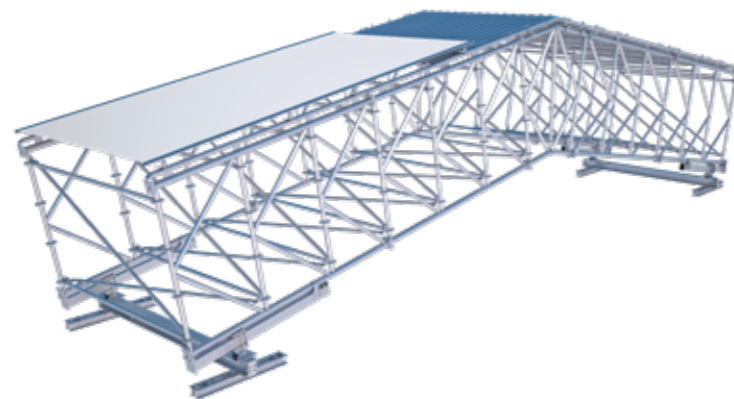

Rain, dust and noise are effectively kept at bay with system-independent roofing and enclosures. Scafom-rux weather and site protection systems require only a few, easy-to-use standard components that can be adapted to different requirements.

For example, our MULTI-ROOF and SCAFFGUARD systems can be quickly assembled using RINGSKAFF components, allowing you to use our scaffolding products in the most space-saving and sustainable way possible.

SCAFFGUARD

MULTI-ROOF

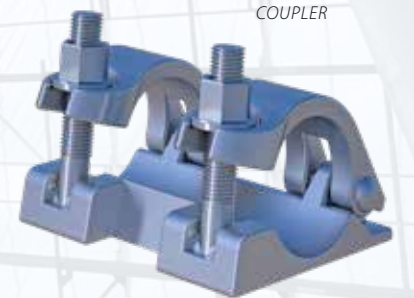

## > SYSTEM-FREE ACCESSORIES

Do you need to bridge openings, passages, or other irregular structures? Or does your scaffold require an extension? For such cases, you need the right scaffold accessories.

From simple couplers for various applications to highly stable lattice beams, our range includes scaffold accessories for every one of your projects. Always focusing on easy handling and the versatility of each scaffold component.

Fixed corner deck

# WHAT'S THE PROCESS FOR RENTING SCAFFOLDING?

Whether for classic house construction projects, maintenance work in LNG tankers and industrial plants, or even for building infrastructure and machinery in mines – Scafom-rux scaffold rental is suitable for a wide variety of challenging projects. You can always rely on our support and a well-structured rental process. But what process can you expect when you rent scaffold material from us?

➤ Scan the QR code for our scaffold rental checklist!

## **STEP 1:** **REQUEST AN OFFER FOR SCAFFOLD RENTAL**

You send us all the relevant information about your project, and we will then prepare a non-binding rental offer for you. Of course, we will already be available to advise you and go through the best options for your project. Additionally, our technical department can create a material list and plans with the relevant specifications for you.

## **STEP 2:** **CHECK AND ACCEPT THE RENTAL OFFER**

If you accept our offer, we will make all the necessary arrangements to provide you with the material ordered at the agreed time.

## **STEP 3:** **THE RENTAL MATERIAL IS COLLECTED OR DELIVERED**

You can either pick up your rented material from our worldwide scaffold rental yards or have it delivered to your site. If you wish, we can organise the transport of the material to the construction site for you.

## **STEP 4:** **THE SCAFFOLD RENTAL PERIOD BEGINS**

The rental period begins on the day the scaffolding material is delivered or collected, or on the date specified in the rental agreement. From then on you can use our material for your project.

## **STEP 5:** **RETURN THE SCAFFOLDING MATERIAL TO US**

When you have completed your project and want to return the rental material, simply inform us about the return transport. You will then receive a delivery note with the material quantities from us. Before you return the scaffolding, you don't have to check much other than the completeness and integrity of the scaffolding material you have rented.

## **STEP 6:** **YOU RECEIVE THE RETURN CONFIRMATION FROM US**

Once the material has been returned to our yard at the end of the rental period, we will send you the corresponding return confirmation.

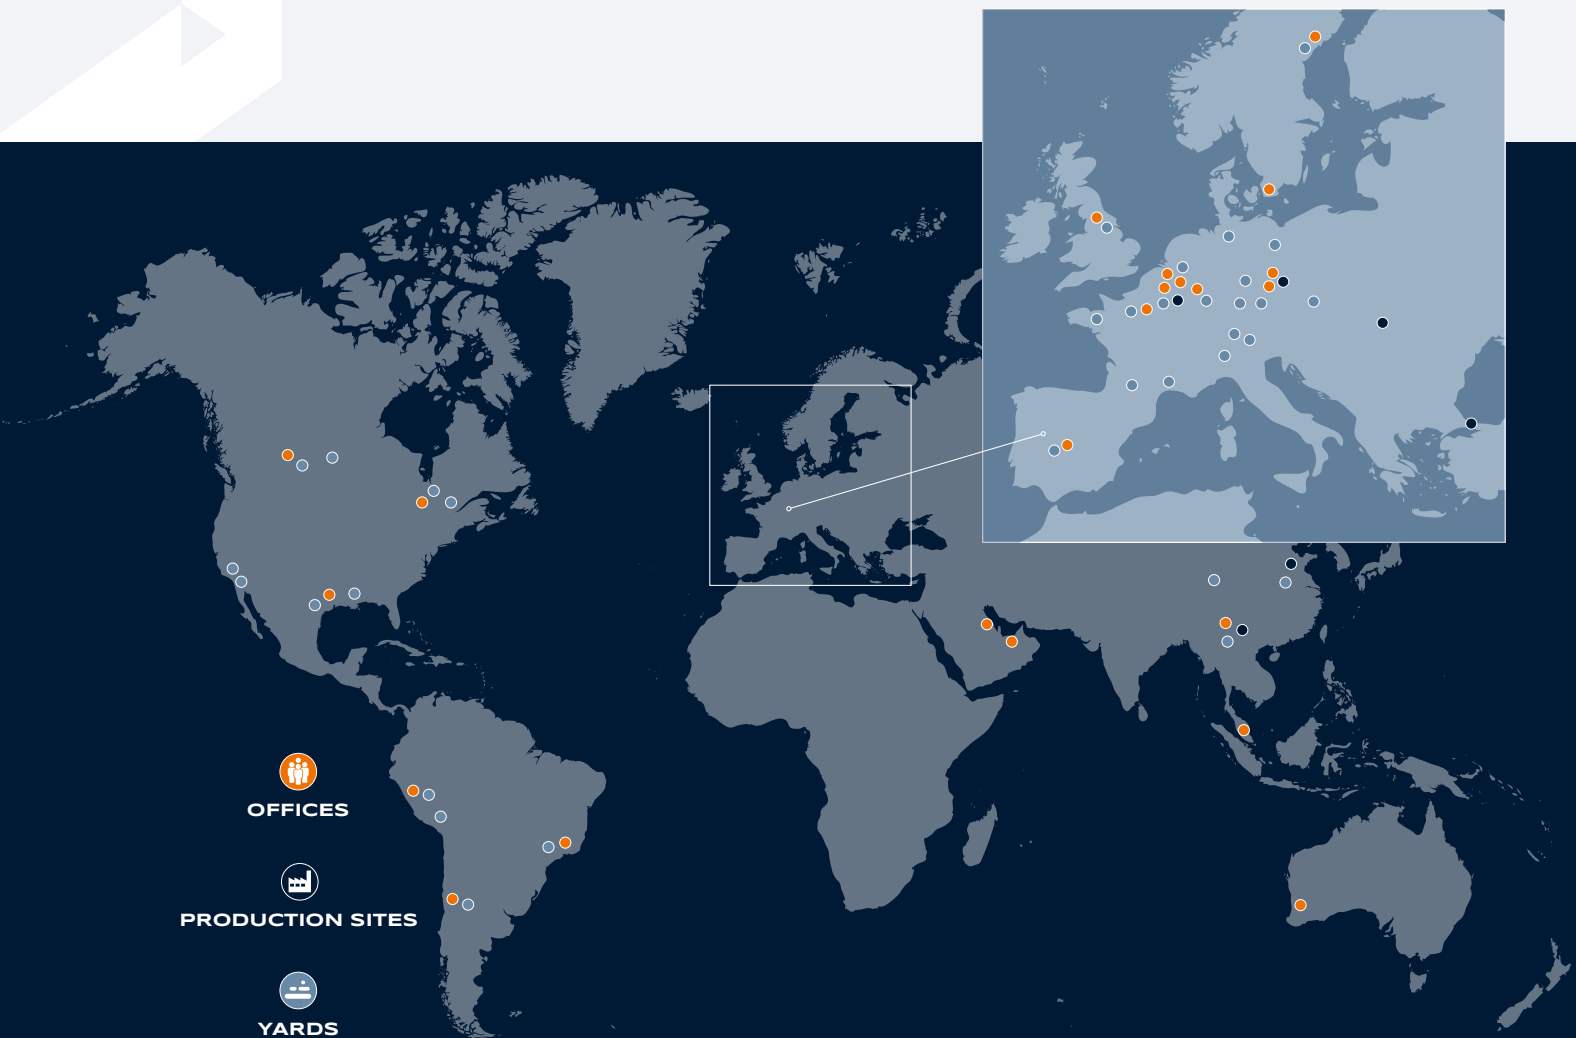

## **STEP 7:** **THE RENTAL PROCESS IS COMPLETE**

Our warehouse staff will now check and count each piece of scaffolding. Once this is complete, we will send you the documentation. Once you have this document in hand, the rental process is complete.

## **> SCAFOM-RUX** **YOUR PARTNER IN SCAFFOLDING**

Scafom-rux sells and rents high-quality industrial and façade scaffolding systems from our own production. Our entire team understands the needs and requirements of scaffolders across various industries such as construction, oil and gas, mining, shipbuilding and maintenance, and many others. This allows us to assist you in finding the best possible solution for your scaffolding project. Additionally, we offer extra services like professional training and technical support.
